

JOIN THE MUSEUM OF THE GREAT PLAINS

The MUSEUM OF THE GREAT PLAINS logo features the image of *Bison latifrons*, or longhorn bison, an ancestor of the modern Plains "buffalo." *Latifrons* (lit, "broad forehead") crossed into North America during a period of glacial advance in the Pleistocene, some 500,000 years ago. The animal stood over eight feet tall, weighed about two tons, and had horns that reached a width of up to seven feet from tip to tip. The species became extinct in North America roughly 21,000 years ago. Today, the distant cousin of *B latifrons*, the *Bison bison*, can be seen in the nearby Wichita Mountains Wildlife Refuge.
